Functional Testing

Tester Name: Gerard Rudolph **Date: 21/07/2022**

Functions	Achieved? Yes/No
Log In Screen Exists	Yes
Allow users to log in using a username and password to access an admin or learner account	Yes
Allow users to press a button that will direct them to the sign-up page where they can sign up for a learner account	Yes
Allow users to select the help button	Yes
Sign Up Screen Exists	Yes
Allow learners to register/sign up by entering a username and by entering the same password twice	Yes
Allow learners to enter their full name	Yes
Allow learners to enter their grade	1.Yes but
Allow learners to enter their class	Yes
Allow learners to select a gender	Yes
Allow learners to select portfolio options	Yes
Allow learners to select a button to create their account provided all the above information has been entered	Yes
Allow users to select the help button	Yes
Student Home Page Exists	Yes
Allow learners to view their details (name, surname, username, grade, class, gender and portfolios with their accumulated hours in each portfolio)	Yes
Allow learners to select an “Edit account” button	Yes
Allow learners to navigate to other parts of the program through tabs	Yes
Allow users to select the help button	Yes
Edit Account (Student) Screen Exists	Yes
Allows users to edit their existing details, in separate fields (Name, surname, grade, class, portfolios and gender)	Yes
Allow users to select an “Enter” button to confirm the changes	Yes
Allow users to select a “Cancel” button to exit the edit screen and return to the home screen	Yes
Events Screen (Student) Exists	Yes
Allow learners to view existing events related to their portfolio	Yes
Allow learners to search for events by date which will return event ID, event name, event date, portfolio and how long the event took (Hours)	Yes
Allow learners to search for events by name which will return event ID, event name, event date, portfolio and how long the event took (Hours)	Yes

Allow learners to search for events by ID which will return event ID, event name, event date, portfolio and how long the event took (Hours)	Yes
Allow learners to navigate to other parts of the program through tabs	Yes
Allow users to select the help button	Yes
Participation Screen (Student) Exists	Yes
Allow learners to log their participation in events	Yes
Allow learners to view records of their participation in events	Yes
Allow learners to delete record of their participation in events	Yes
Allow learners to search for events that they have participated in, by portfolio which will return the event ID, the event name, Student ID, hours, and portfolio.	Whole text only
Allow learners to search for events that they have participated in, by event name which will return the event ID, the event name, Student ID, hours, and portfolio.	Yes
Allow learners to search for events that they have participated in, by event ID which will return the event ID, the event name, Student ID, hours, and portfolio.	Yes
Allow learners to navigate to other parts of the program through tabs	Yes
Allow users to select the help button	Yes
Admin Home Page Exists	Yes
Allow admins to view their details (Name, surname and portfolios)	Yes
Allow admins to select an “Edit account” button	Yes
Allow admins to select a “Create new admin account’ button	Yes
Allow admins to navigate to other parts of the program through tabs	Yes
Allow users to select the help button	Yes
Edit Admin Page Exists	Yes
Will allow admins to edit their existing details in separate fields (Name, surname, and portfolios)	Yes
Allow admins to select an “Enter” button to confirm any changes they have made	Yes
Allow admins to select a “Cancel” button to exit the screen and discard any changes	Yes
Create New Admin Page Exists	Yes
Allow an existing admin to enter details for a new admin (Full name, username, password, confirmation of password, Portfolios)	Yes
Allow admin to select an “Enter” button to create the new admin account	Yes
Allow the admin to select a “cancel” button to exit the screen and discard any information they have entered.	Yes
Participation (Admin) Page Exists	Yes
Allow admins to view all participation records related to their portfolios	Yes
Allow admins to search for participation records by Event ID which will return the event ID, the event name, the student ID, student	Yes

name, the relevant portfolio and the number of hours for which the event counts.	
Allow admins to search for participation records by event name which will return the event ID, the event name, the student ID, student name, the relevant portfolio and the number of hours for which the event counts.	Yes
Allow admins to search for participation records by student name which will return the event ID, the event name, the student ID, student name, the relevant portfolio and the number of hours for which the event counts.	Yes
Allow admins to search for participation records by portfolio which will return the event ID, the event name, the student ID, student name, the relevant portfolio and the number of hours for which the event counts.	Yes
Allow admins to delete participation records	Yes
Allow admins to create participation records	Yes
Allow admins to navigate to other parts of the program through tabs	Yes
Allow users to select the help button	Yes
Events (Admin) Page Exists	Yes
Allow admins to view existing events related to their portfolio	Yes
Allow admins to select a “create new event” button	Yes
Allow admins to select an “edit existing event” button	Yes
Allow admins to search for events, by date which will return event ID, event name, event date, portfolio and how long the event took	Yes
Allow admins to search for events, by name which will return event ID, event name, event date, portfolio and how long the event took	Yes
Allow admins to search for events, by event ID which will return event ID, event name, event date, portfolio and how long the event took	Yes
Allow admins to navigate to other parts of the program through tabs	Yes
Allow users to select the help button	Yes
Edit Event (Admin) Page Exists	Yes
Will initially present the admin with a single space to enter an event ID	Yes
Will initially present the admin with a “Find event” button to search for an event matching the ID they have entered.	Yes
Will allow the admin to select an “Enter” button to confirm the changes they have made	Yes
Will allow the admin to select a “cancel” button to exit the screen and discard any changes they have made.	Yes
After an event matching an entered ID has been found, the rest of the screen will be displayed with fields containing the current values assigned to that event	Yes
Will allow the admin to change the existing values assigned to an event.	Yes

Create New Event (Admin) Page Exists	Yes
Will allow the admin to enter all the details of an event (name, hours, date, and portfolio)	Yes
Will allow the admin to select an “Enter” button to create the event provided all the fields are complete	Nothing happened
Will allow the admin to select a “cancel” button to exit the screen and discard any details they have entered	Yes
Students Page Exists	Yes
Allow admins to search for learners by name which will return student ID, student name, grade, class, gender (M/F), catering hours, photography hours, AV hours and first aid hours	No (double space?)
Allow admins to search for learners by grade which will return student ID, student name, grade, class, gender (M/F), catering hours, photography hours, AV hours and first aid hours	4.Partial
Allow admins to search for learners by Student ID which will return student ID, student name, grade, class, gender (M/F), catering hours, photography hours, AV hours and first aid hours	Only double digits
Allow admins to navigate to other parts of the program through tabs	Yes
Allow users to select the help button	Yes
Help Page Exists	Yes
Allow users to select a button that relates to their problem which will direct them to a video that explains how to solve the problem or perform the task	Yes
Allow users to contact someone if none of the solutions provided could assist them	No

Please write any general comments below:

…well I like it!
I’d prefer a partial string search – rather than having to know the whole name I’m searching for and needing to spell it exactly the way it was entered.
1. Yes but – could enter invalid options without receiving a warning
~~2.Yes… but~~ – nope – this works
~~3.Kinda –~~ nope – this works
4.Partial – returned some (but not all) results if I type only digit(s) before decimal
If I type the decimal – no results, even with correct grade selected, e.g 10.5
